› A NEW ALTERNATIVE

King's Fibreglass would like to offer you an alternative in Coffee Carts. Our Cart has been designed and manufactured with the following benefits in mind.

You are now able to tow your cart to your event, with the ease of a one person set up.

The clean spacious layout enables two people to work comfortably side by side.

The fibreglass construction of the cart allows you to maintain your corporate identity - choose a colour finish that matches your uniforms or logo!

King's Fibreglass is an experienced manufacturer, with over 200 trailers sold world-wide, and has worked on the design of the mobile coffee cart for over 18 months. After careful research and input from local health departments, coffee users and suppliers, we believe we have achieved a new direction in coffee carts.

Clear and open serving area

Spacious kitchen facilities

STANDARD FEATURES

The slim, futuristic, lightweight design was developed to make the trailer easy to reverse and tow, with excellent driver vision. The trailer weighs 780kg plus extras. A full tank of water will add approximately 100kg to the overall weight.
